BioDoph-7 Plus®

Dietary Supplement

For Healthcare Professionals Only

Classically defined, probiotics are “a preparation of, or a product containing viable, defined microorganisms in sufficient numbers, which alter the microbiota (typically by colonization) in a compartment of the host, and by that, exert beneficial health effects in this host.”¹ Traditionally, probiotics have consisted of species from the genera *Lactobacillus* and *Bifidobacterium*.

BioDoph-7 Plus® supplies a unique blend of probiotics and prebiotics, along with additional support for a healthy GI tract.

Documented research has indicated important benefits associated with the use of probiotic bacteria, including improved digestion, enzymatic activity and overall health. For example, *L. plantarum* is recognized as a major colonizer² and was shown to “decrease translocation, improve mucosal status, improve liver status, improve the immunologic status of the mucosa, and to reduce mucosal inflammation.” Subsequently, *L. plantarum* is considered to be an integral part of the host’s immunologic defense.³ Probiotics have also shown to have a modulating effect on the immune system. A probiotic combination of Lactobacilli species, bifidobacteria species and a Streptococcal strain was shown to be immuno-modulating by virtue of both the upregulation of IL-10 production by dendritic cells, and the decreased production of interferon-gamma by T-cells. Also noted was a “diminished proinflammatory effect via a decrease in the lipopolysaccharide production of IL-12.”⁴

Supplies ingredients that:

- Improves digestive function
- Improves immunologic status
- Increases beneficial anaerobes
- Decreases “unfriendly” organisms
- Stimulates phagocytosis
- Soothes gastric mucosa

Like probiotics, prebiotics also play a beneficial role in GI health, via their alteration of the gut flora composition in favor of beneficial bacterial.⁵ Prebiotics are categorized as a “non-digestible food ingredient that beneficially affects the host by selectively stimulating the growth and/or activity of one or a limited number of bacteria in the colon.”⁶ The prebiotic inulin demonstrated beneficial results with administration, by virtue of its ability to stimulate the enumeration of the colonic bifidobacteria population, thus improving the composition of the gut flora.⁷ Arabinogalactan from larch is also an effective prebiotic fiber. In the large intestine it is actively fermented by friendly intestinal microflora, resulting in an increased number of

beneficial anaerobes, while simultaneously decreasing unfriendly organisms such as Clostridia.⁸ Marshmallow root extract, also considered a prebiotic, supplies polysaccharides including arabinogalactans and glucan. It stimulates phagocytosis, and has been shown to alleviate local irritation of the gastric mucosa.⁹

Thus, when considering overall health benefits, the combination of prebiotics and probiotics are a judicious choice, as both have documented success in improving gastrointestinal health. Additionally, by utilizing a prophylactic approach, gastrointestinal complaints may be addressed in a means that will promote optimal wellness.

Each capsule of **BioDoph-7 Plus**[®] contains 20 billion viable organisms at the time of manufacture.

Note: The long term viability of probiotic organisms is enhanced by refrigeration.

Research shows that gut health is critical to overall health and that an unhealthy gut contributes to a wide range of diseases, conditions, an impaired immune and nervous system, and even hormonal imbalance. Supporting gastrointestinal health and restoring the integrity of the gut barrier are essential to optimizing overall health.

FC-Cidal™

Product Number: 6310 (100C)

FC-Cidal supplies a proprietary blend of herbs and herbal extracts, which function to support healthy GI function*. Herbs, spices and botanical preparations often exhibit antimicrobial properties due to a wide array of terpenoid and polyphenolic compounds. Culinary herbs have long been used to control pests and food-borne yeasts and molds in the context of food safety.

BioMega-1000

Product Number: 1400 (100C)

BioMega-1000 supplies the highest quality, all-natural (not modified by distillation processes) fish oil, supplying EPA and DHA omega-3 fatty acids. BioMega-1000 fish oil surpasses all national and international standards for environmental pollutants, including dioxins, PCBs, pesticides and heavy metals. The most active and beneficial derivatives of marine derived ω -3 fatty acids are eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA), natural precursors that allow the body to make Specialized Pro-Resolving Mediators (SPMs), supporting healthy inflammatory responses. Both the brain and nervous system are higher in DHA, as compared to the rest of the body. As an omega-3 fatty acid, it has the ability to impact most physiological functions.

Active Ingredients: Vitamin E (as d-alpha tocopherol), Omega-3 fatty acids. Each softgel capsule of BioMega-1000 contains 1,000 mg of natural marine lipid concentrate, providing a natural source of Omega-3 fatty acids; EPA (Eicosapentaenoic acid) 180 mg and DHA (Docosahexaenoic acid) 120 mg.

Gastrazyme™

Product Number: 1140 (90T)

Gastrazyme™ supplies specific nutrients including vitamin U complex, chlorophyllins and vitamin A, ingredients all known to support the health of GI tract, which may become stressed due to normal, everyday factors. Early studies have recognized the effectiveness of raw cabbage juice in normalizing gastric and intestinal function. Glutamine and methionine derivatives present in this juice are believed to be the active principles. Specific attention has focused on methionine S-methylsulfonium (MMS) in the chlorinated form. MMS occurs in a variety of fruits and vegetables, such as cabbage. Studies have demonstrated that MMS supports the normal healing process of the stomach following exposure to nonsteroidal anti-inflammatory agents (NSAIDs). Traditionally, this compound has been designated "Vitamin U", although it does not meet the classic definition of a vitamin.

Active Ingredients:

Vitamin A (as natural mixed carotenoids and palmitate), Gamma Oryzanol (from rice), Chlorophyllins (from Mulberry leaf), Vitamin U Complex (as DL-Methionine methylsulfonium chloride), Superoxide Dismutase (from vegetable culture†), Catalase (from vegetable culture†). †Specially grown, biologically active vegetable culture containing naturally associated phytochemicals including polyphenolic compounds with SOD and catalase, dehydrated at low temperature to preserve associated enzyme factors.

IPS®

Product Number: 6415 (90C)

IPS® is a comprehensive Intestinal Permeability Support supplement, consisting of a proprietary blend of botanical compounds and amino acids, along with other synergistic constituents. It provides support for healthy gut function, specifically as it relates to permeability and intestinal mucosa integrity. It includes L-Glutamine, which is the preferred fuel for intestinal tissues, promoting repair and intestinal healing. L-Glutamine has also been demonstrated to be a functional component in the repair of ulcers, as well as a contributor to the healing of leaky gut conditions. When the intestinal epithelium becomes injured or compromised, chronic health disturbances may result. IPS® is a unique formula designed to address the specific issue of altered intestinal permeability. It supplies a comprehensive array of nutritional factors to support healthy intestinal function.

L-Glutamine Powder™

Product Number: 5209 (500 g)

L-Glutamine is the most abundant amino acid in the body. Although the body manufactures glutamine during times of extreme stress (such as after very heavy exercise or an injury), in certain circumstances the body may need more glutamine than it can make. Most glutamine is stored in the muscles, followed by the lungs, where much of the glutamine is made. According to the University of Maryland Medical Center (<https://umm.edu.com>), glutamine functions as an important compound in removing excess ammonia (a common waste product in the body). It also assists in immune system functions, and appears to be needed for normal brain function and digestion. Glutamine helps to protect the gastrointestinal mucosa, and is a major fuel for enterocytes. It also supports tissues in the body that rapidly turn over, such as intestinal cells (intestinal epithelium). High levels of cortisol during times of stress can lower the body's stores of glutamine.

L-Glutamine Powder™ supplies 3g of L-Glutamine per teaspoon, as a nonhydrolyzed, free-form L-Amino Acid.

Active Ingredients:

Glutamine (as L-Glutamine). L-Glutamine is a non-hydrolyzed, naturally produced, free-form L-Amino Acid. CERTIFIED PURE. Contains no additives of any kind.
