

K2·D3 Matrix Liquid

Superior cardiovascular and bone support for your patients with active vitamin D3 and non-soy derived vitamin K2 in its active MK-7 form.

Each drop contains:

Vitamin D3 (cholecalciferol)	250IU
Vitamin K2 (menaquinone-7, K2VITAL®)*	30mcg

K2VITAL®

*K2VITAL® is the registered trademark of Kappa Bioscience AS.

15 ml liquid

Gluten, soy and dairy free.

K2·D3 Matrix Liquid is designed for optimal delivery of vitamins K2 and D3 into the body. Together, these vitamins work synergistically to support heart health, bone health, immune function and more.

Vitamin K2 is a nutrient that is now well-known to be crucial for the proper distribution of calcium into the skeletal system and preventing arterial calcification in the cardiovascular system. It does this through its ability to activate two proteins, osteocalcin and matrix-GLA.

Vitamin D3, also known as cholecalciferol, is the preferred form of vitamin D for optimal bioavailability and function within the body. Classically, vitamin D3 is known for its ability to upregulate calcium absorption from the gut. However,

research has discovered that it is imperative for countless actions within the body and it is needed for proper immune function, mood health, cardiovascular function, skin health and proper gene expression. In fact, many experts now refer to vitamin D3 as a hormone because of these many actions and its ability to actually modify genes within the body.

Each dose (4 drops) of Cyto·Matrix's K2·D3 Matrix Liquid features 120mcg of vitamin K2 in its most active MK-7 form, as well as 1000 IU of vitamin D3. Vitamin K2 is found as K2Vital®, the patented non-soy derived MK-7. K2·D3 is in a medium chain triglyceride oil base to encourage optimal absorption and bioavailability.

Key points

- K2 and D3 provided in combination for optimal cardiovascular and bone health
- Vitamin K2 is found as K2Vital®, the patented non-soy derived MK-7
- In a medium chain triglyceride oil base to encourage optimal absorption and bioavailability
